

TO-DO LIST APPLICATION

Project Documentation

Intern Details

Field	Details
Intern ID	CITS1859
Full Name	Snehal Bhandarkar
No. of Weeks	4 Weeks
Project Name	To-Do List App using Python Tkinter

1. Introduction

The To-Do List Application is a GUI-based desktop application developed using Python and Tkinter. This application allows users to manage their daily tasks efficiently through a simple and user-friendly interface.

2. Objective

The main objective of this project is to understand GUI development using Python Tkinter and implement basic task management functionalities such as adding and deleting tasks.

3. Technologies Used

Technology	Purpose
Python	Programming Language
Tkinter	Graphical User Interface
VS Code	Code Editor and Development Environment

4. Features

- Add daily tasks
- Delete completed tasks
- Simple and clean GUI interface
- Easy user interaction

5. Working of the Application

The user enters a task into the input field and clicks the 'Add Task' button. The task is then displayed in the task list. Users can select any task from the list and remove it using the 'Delete Task' button.

6. Conclusion

This project helped in understanding event-driven programming, GUI development, and Python programming fundamentals. The application provides a simple solution for daily task management.
